SIM CITY 2000™

THE ULTIMATE CITY SIMULATOR

ADDENDUM & QUICK START GUIDE

Macintosh Version

SIM CITY 2000

Quick-Start

System Information

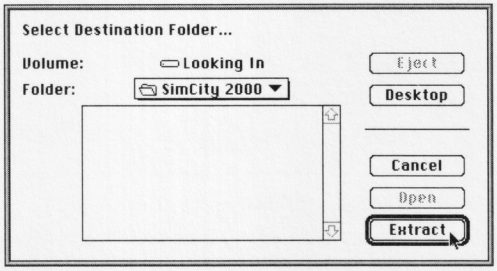
Supports: LC, Performa, II, Centris, and Quadra series; Color Classic; PowerBook (160, 165c, 180, 180c, Duo 210, 230)
Requires: 4 MB RAM, (2.5 MB free), mouse, hard disk (3 MB free), color monitor with 8-bit graphics (256-color), System 7.0 or higher

Installing SimCity 2000

SimCity 2000™.sea

SimCity 2000 must be installed to a hard disk before use. Here's how to do it:

1. Make a new folder on your hard disk, and name it SimCity 2000.
2. Put the SimCity 2000 Disk 1 into your floppy disk drive.
3. Double-click on the SimCity 2000™.sea icon.
4. When the dialog box opens, navigate to the new SimCity 2000 folder on your hard disk and click on the Extract button.



5. When the extraction process is done, remove the floppy disk from your drive.
6. Put the SimCity 2000 Disk 2 into your floppy disk drive.
7. Double-click on the Cities.sea icon.
8. Repeat steps 4 and 5.

Starting SimCity 2000

SimCity 2000™

Double-click on the SimCity 2000 icon, and you're on your way.

Notes and Stuff

Large Monitors

If you have a monitor larger than 13", you may have to set your memory partition higher than the default setting to get a full-screen City window. To do this, click once on the SimCity 2000 icon, then choose Get Info from the Finder File menu. Change the number in the Application Minimum Memory Size Box from 2500 to 3500, then close the Info Window.

The Manual

Keep the manual handy. In addition to extensive (but quick, easy, entertaining and fun) tutorials, there is a very complete reference section covering every button and window, a lot of inside-the-simulation information, and some city-inspired artwork.

PowerBook Issues

Due to their energy-saving routines, PowerBooks slow down their processors if you don't hit any keys or move the mouse fairly often. This is a great power-saving feature, but it really slows down city time when you just let SimCity run for a while. If this is a problem for you, see your PowerBook manual for instructions on disabling the slowdown feature.

Protect your LCD screen! If you let SimCity 2000 run for a long time on your PowerBook, be sure to turn the brightness and contrast all the way down, or activate the screen-dimming feature.

Seaports and Connections

When your city reaches a certain size, your industry will stop expanding without a good inter-city transportation system. If you have either a river or a coastline, you can build a seaport to boost industry. If you don't have either a river or a coastline, then you can build an inter-city connection by running either rails or a highway to any edge of the terrain.

Additional Credit

Our thanks and appreciation to Bill Goodman of Cyclos, the creator of Compact Pro™—the excellent compression program we are using to fit all of SimCity 2000 onto 2 disks.

Keyboard Shortcuts

The **Cursor Keys** scroll the terrain in the City window.

Shift-click on any button or control to bring up help.

Shift-click anywhere in your city (buildings, infrastructure or terrain) to activate the Query function and open little information windows.

To cancel the placement of roads, rails, subways, zones, etc., press the **Shift** key before you release the mouse button.

Hold down the **Option key** to temporarily activate the Center tool.

Hold down the **"B" key** while in City-building mode to temporarily activate the Bulldozer Demolish/Clear tool.
